Hi Tunde, Thank you for the opportunity to review. I do not see anything that would conflict with my current understanding of the positions the agency is taking, and what I will therefore go by in Region 10, provided this is concurred on by OAQPS, OECA, and OGC.

Thanks again!

Hi Heather,

I am ready to send out the final letter today to Fulcrum (content same as what I sent you on 3/25, just minor typographical changes).

Was there anything in the letter that you feel would conflict with the R10 case? Just wanted to confirm, before I send this out.

Thanks,

Tünde

Hi Heather,

I forgot to attach the draft letter, and I'm doing so now.

If there is anything in it that would conflict with what R10 is planning to do, please let me know.

I'm back in my office, and can be reached at the number below.

Thanks,

Tunde

Thanks, Brian.

Heather, do we still need to hold off on the applicability determination letter to Fulcrum? I have not changed the draft, so at this point it says that 40 CFR 60 Subpart AAAA is not applicable if certain conditions are met. Will this still conflict with the R10 case?

Fulcrum requested an answer on January 8 and they are hoping to hear from us by the end of April. I will be contacting them to let them know that the project was handed to me, so any update from R10 would be helpful.

Thanks,

Tünde

Tünde,

We have not had any more recent discussion regarding Fulcrum...or at lest I have not been invloved. I will let you know if anything comes up here, but imagine you'll hear about issues before I do.

Thanks!

Brian

Hello,

I'm one of the new engineers in Region 9's Air Enforcement Office. I will be taking over the Fulcrum BioEnergy project from Steve Frey and Mae Wang recently forwarded to me some of the 2/25 - 2/26 email discussions. I'm wondering what are the latest developments. Please add me to your email list and also give me a brief update. Between now and Wednesday I will be in meetings, so email may be the best way to reach me.

Thank you.
